Customer Reviews

We are regular users of the public library but when I find something there that really catches my child's eye, I purchase it. This is great if you have a kid who loves science and roadrunner and coyote cartoons. It does a wonderful job explaining the science behind coyote's experiments. Now, when we watch the cartoons, my son is explaining to me why coyote's idea is going to fail and how he could improve upon it. Check out the other books in the series. They are just as great!

Love these books! The art and the quality are awesome! Worth the \$.

Awesome great bought it for tattoo patterns
