Our Council has studied this for the past several months, and it has become a worthy touchstone for how leaders have been wishing for a way to embrace a new way, rather than focusing uselessly on diminishing returns for established mainline churches. Daubert articulates a sensible approach which ends up involving letting go of empty patterns of operation in favor of life-giving clarity about doing those things that we are convinced God wants us to be doing, which are faithful, and which end up spurring the laggards to catch up to those in the church who have started having so much fun being and doing stuff which actually fits within what our confession says is most precious to us.

I've read the book to understand the thinking behind an approach to church building that works from the bottom, grassroots level, to organizational level. Very clear explanation with good outlines for

retreats and group work. Excellent process for any group thinking.

We are using this book in our church council meetings to help us thru the call process. Very good book.

Inspiring. A different way to look at church. Have used purpose and guiding principles in the business world and this book provides a roadmap for refocusing our congregation.

This book is very inspiring. It gives you plenty of support and tools to use in a small congregation or small groups.

Required reading by our current interim pastor. It was an easy download to my cell phone. Always handy to read.
